Introduction to English Phonetics Richard Ogden 2017-02-06 The second edition of this distinguished textbook introduces undergraduates to the concepts, terminology and representations needed for an understanding of how English is pronounced around the world. Assuming no prior knowledge, this textbook guides the reader through the vocal tract and explains how the sounds of speech are made, offering an accessible and expanded introduction to areas including transcription, vowels and acoustic analysis. As far as possible, it uses naturally-occurring conversational speech so that readers are familiar with the details of everyday talk (and not just the careful pronunciations presented in dictionaries.) The book also includes a new concluding chapter that works through a piece of spoken data to show the reader how a more complete phonetic analysis can be conducted. Examples are taken from around the English-speaking world, including North America, Australia, New Zealand and varieties of British English. The book takes an open-minded approach to what sounds of English might be significant for making meaning, and highlights the significance of word meaning, morphology, sociolinguistics and conversational interaction in phonetic analysis.

SOP 12-1 Reporting Pursuant to the Global Investment Performance Standards AICPA 2017-05-15 Supersedes SOP 06-1, Reporting Pursuant to the Global Investment Performance Standards This Statement of Position (SOP) has been issued to guide practitioners with engagements to examine and report on aspects of an investment firm's compliance with the Global Investment Performance Standards (GIPS® standards). In addition, this SOP provides guidance on engagements to examine and report on the performance results of specific

composites in conformity with applicable guidance. Presentation of an investment firm's past performance can be a powerful tool for attracting new clients. These presentations have been the focus for the past several years due to market forces, competition, and consolidation. To promote fair representation and greater comparability in performance presentations, CFA Institute created the GIPS standards. Many investment firms' claim of compliance with these standards has been regarded as providing a competitive advantage. This SOP updates SOP 06-1, Reporting Pursuant to the Global Investment Performance Standards, for the most recent changes to the GIPS standards.

Algorithmic Foundations of Robotics IX David Hsu 2010-11-18 Robotics is at the cusp of dramatic

transformation. Increasingly complex robots with unprecedented autonomy are finding new applications, from medical surgery, to construction, to home services. Against this background, the algorithmic foundations of robotics are becoming more crucial than ever, in order to build robots that are fast, safe, reliable, and adaptive. Algorithms enable robots to perceive, plan, control, and learn. The design and analysis of robot algorithms raise new fundamental questions that span computer science, electrical engineering, mechanical engineering, and mathematics. These algorithms are also finding applications beyond robotics, for example, in modeling molecular motion and creating digital characters for video games and architectural simulation. The Workshop on Algorithmic Foundations of Robotics (WAFR) is a highly selective meeting of leading researchers in the field of robot algorithms. Since its creation in 1994, it has published some of the field's most important and lasting contributions. This book contains the proceedings of the 9th WAFR, held on December 13-15, 2010 at the National University of Singapore. The 24 papers included in this book span a wide variety of topics from new theoretical insights to novel applications.

Ford Madox Ford and the Misfit Moderns R. Hawkes 2012-01-01 Ford Madox Ford is a major modernist writer, yet many of his works do not conform to our assumptions about modernism. Examining ways in which he, alongside other 'misfit moderns', undermines 'stabilities' we expect from novels and memoirs, this book poses questions about the nature of narrative and the distinction between modernism and modernity.

African Political Systems Revisited Aleksandar Bošković 2022-04-08 Reexamining a classical work of social anthropology, *African Political Systems* (1940), edited by Fortes and Evans-Pritchard, this book looks at the colonial and academic context from which the work arose, as well as its reception and its subject matter, and looks at how the work can help with analysis of current politics in Africa. This book critically reflects upon the history of anthropology. It also contributes to a political anthropology which is aware of its antecedents, self-reflexive as a discipline, conscious of pitfalls and biases, and able to locate itself in its academic, social and political environment.

Foyle's Philavery Christopher Foyle 2007 The word 'philavery' was specially invented to describe this book - a collection of words chosen simply on the grounds of their aesthetic appeal. Some of these words appeal because of their aptness, some for their obscurity, some for their euphony, and some for their quirkiness. As a collection they will be a delight to all word lovers.
