Learning Mastercam Mill Step by Step James Valentino 2003 This unique text presents a thorough introduction to Mastercam Mill for students with little or no prior experience. It can be used in virtually any educational setting -- from four-year engineering schools to community colleges and voc/tech schools to industrial training centers -- and will also serve as a reliable reference for on-the-job use or as a self-study manual. The award-winning authors have carefully arranged the contents in a clear and logical sequence and have used many hundreds of visuals instead of wordy explanations. An enclosed CD contains Mastercam Demo V. 9 and also includes examples and exercises from the text for student practice. Learning Mastercam Mill Step by Step is sure to become a valuable resource for anyone learning or using Mastercam Mill overwhelmingly, the leading software of its type in industry.

Cam Plastometer Operation Manual Including Theory and Design M. J. Stewart 1974 "A Cam Plastometer is a compression testing machine used in studying the hot-working behaviour of metals. The deformation of cylindrical specimens is controlled by a shaped cam which maintains the true strain rate constant throughout the hot-working test. This report describes the recently completed Cam Plastometer at the Mines Branch, Ottawa, Canada. The theory of design and the operating procedures are also discussed. Tests can be conducted at constant strain rates between 0.1 and 160 per sec. The maximum load is 0.45 MN (100,000 lb) and the maximum test temperature is 1300° C"--Abstract, page i.
