Watunna Marc de Civrieux 2010-06-28 Originally published in Spanish in 1970, Watunna is the epic history and creation stories of the Makiritare, or Yekuana, people living along the northern bank of the Upper Orinoco River of Venezuela, a region of mountains and virgin forest virtually unexplored even to the present. The first English edition of this book was published in 1980 to rave reviews. This edition contains a new foreword by David Guss, as well as Mediata, a detailed myth that recounts the origins of shamanism.

Known by God Brian S. Rosner 2017-09-12 Who are you? What defines you? What makes you, you? In the past an individual's identity was more predictable than it is today. Life's big questions were basically settled before you were born: where you'd live, what you'd do, the type of person you'd marry, your basic beliefs, and so on. Today personal identity is a do-it-yourself project. Constructing a stable and satisfying sense of self is hard amidst relationship breakdowns, the pace of modern life, the rise of social media, multiple careers, social mobility, and so on. Ours is a day of identity angst. Known by God is built on the observation that humans are inherently social beings; we know who we are in relation to others and by being known by them. If one of the universal desires of the self is to be known by others, being known by God as his children meets our deepest and lifelong need for recognition and gives us a secure identity. Rosner argues that rather than knowing ourselves, being known by God is the key to personal identity. He explores three biblical angles on the question of personal identity: being made in the image of God, being known by God and being in Christ. The notion of sonship is at the center - God gives us our identity as a parent who knows his child. Being known by him as his child gives our fleeting lives significance, provokes in us needed humility, supplies cheering comfort when things go wrong, and offers clear moral direction for living.

Women in Philosophy Katrina Hutchison 2013-10-23 Despite its place in the humanities, the career prospects and numbers of women in philosophy much more closely resemble those found in the sciences and engineering. This book collects a series of critical essays by female philosophers pursuing the question of why philosophy continues to be inhospitable to women and what can be done to change it. By examining the social and institutional conditions of contemporary academic philosophy in the Anglophone world as well as its methods, culture, and characteristic commitments, the volume provides a case study in interpretation of one academic discipline in which women's progress seems to have stalled since initial gains made in the 1980s. Some contributors make use of concepts developed in other contexts to explain women's under-representation, including the effects of unconscious biases, stereotype threat, and micro-inequities. Other chapters draw on the resources of feminist philosophy to challenge everyday understandings of time, communication, authority and merit, as these shape effective but often unrecognized forms of discrimination and exclusion. Often it is assumed that women need to change to fit existing institutions. This book instead offers concrete reflections on the way in which philosophy needs to change, in order to accommodate and benefit from the important contribution women's full participation makes to the discipline.

Dialogue Among Civilizations Kofi Atta Annan 2001 This book captures the essence of what was an important starting point for the year for Dialogue among Civilizations

(2001). Leaders from all continents assembled in September 2000 to share their views on the eve of the historic U.N. Millennium Summit. The political perspectives advanced then were complemented by contributions from personalities drawn from literature, the media, academia, diplomacy and international organizations. 'Dialogue among civilizations' is an essential stage in the founding of a form of human development both sustainable and equitable, humanizing globalization and laying the basis of an enduring peace.

The End of the Cognitive Empire Boaventura de Sousa Santos 2018-07-16 In The End of the Cognitive Empire Boaventura de Sousa Santos further develops his concept of the "epistemologies of the South," in which he outlines a theoretical, methodological, and pedagogical framework for challenging the dominance of Eurocentric thought. As a collection of knowledges born of and anchored in the experiences of marginalized peoples who actively resist capitalism, colonialism, and patriarchy, epistemologies of the South represent those forms of knowledge that are generally discredited, erased, and ignored by dominant cultures of the global North. Noting the declining efficacy of established social and political solutions to combat inequality and discrimination, Santos suggests that global justice can only come about through an epistemological shift that guarantees cognitive justice. Such a shift would create new, alternative strategies for political mobilization and activism and give oppressed social groups the means through which to represent the world as their own and in their own terms.

Re-envisioning Sovereignty Trudy Jacobsen 2016-04-08 Sovereignty, as a concept, is in a state of flux. In the course of the last century, traditional meanings have been worn away while the limitations of sovereignty have been altered as transnational issues compete with domestic concerns for precedence. This volume presents an interdisciplinary analysis of conceptions of sovereignty. Divided into six overarching elements, it explores a wide range of issues that have altered the theory and practice of state sovereignty, such as: human rights and the use of force for human protection purposes, norms relating to governance, the war on terror, economic globalization, the natural environment and changes in strategic thinking. The authors are acknowledged experts in their respective areas, and discuss the contemporary meaning and relevance of sovereignty and how it relates to the constitution of international order.

Comunicação, Representações e Práticas Interculturais: Uma Perspectiva Global Centro de Estudos Interculturais (cei) do Instituto Superior de Contabilidade E Administração do Por 2015-04-14 Comunicação, Representações e Práticas Interculturais: Uma Perspectiva Global é produto da investigação de uma equipa de autores provenientes de Portugal, China, Finlândia, Turquia, Canadá, Brasil, Irão, Espanha, Itália, Eslovénia, Argentina, Roménia, Lituânia, Japão, Austrália, Irlanda, Estados Unidos da América e França. Os ensaios estão organizados em cinco secções temáticas, que abordam a comunicação, as representações, as práticas do quotidiano, as viagens e suas narrativas, o pensamento e a lei, sempre numa perspectiva intercultural. O conceito de interculturalidade é intencionalmente impreciso, tal é a singularidade e a diversidade do seu significado potencial. A noção de 'intercultural' pode ser interpretada de inúmeras formas, quase sempre conotadas com

um certo exotismo, e assim entrou na moda. Mas nestas páginas, o intercultural é entendido enquanto movimento, trânsito, viagem, enquanto dinâmica entre culturas. A viagem intercultural contemporânea é uma jornada global, uma circunavegação à velocidade da luz. Esta abordagem à interculturalidade subjaz a todos os percursos de reciprocidade e de comunicação implícitos no diálogo, na diversidade e no movimento que o prefixo 'inter' sugere. É por isso que aqui examinamos as motivações, características e implicações das interações culturais, em perpétuo movimento, desprovidas de fronteiras espaciais ou temporais, numa indefinição de limites tão arriscada quanto estimulante. As páginas deste livro funcionam como um espaço de hibridismo, subversão e transgressão. Aqui, as divisões binárias e os antagonismos típicos do pensamento ocidental, incluindo a eterna oposição entre teoria e prática, ciência e política, deixam de fazer sentido. Neste livro, as culturas dialogam e fundem-se, algo característico dos espaços de tradução cultural, onde os significados arbitrários são constantemente reposicionados e questionados, em função de novos contextos. Numa contínua criação de incertezas, produzem-se aqui novas hipóteses

Values in Global Administrative Law Gordon Anthony 2011-02-14 Global Administrative Law has recently emerged as one of the most important contemporary fields in public law scholarship. Concerned with developing fuller understandings of patterns in global governance, it represents one of the most insightful ways of viewing the multifarious forms of public power that now exist beyond the State. The present collection brings together some of the leading scholars working in the field of global administrative law to address past and future challenges related to global governance. Each of the contributions picks up on the more general theme of the values that do or should inform global administrative law, and the book in this way provides a novel and thought-provoking commentary on this most engaging area of debate.

Values in Global Administrative Law will be of interest to public lawyers, social and political scientists and scholars of international relations. It will also be an invaluable resource for undergraduate and postgraduate courses that touch partly or exclusively on the challenges of global governance.

Youth Gambling Jeffrey L. Derevensky 2011-10-27 Youth gambling represents a potentially serious public policy and health issue. Nevertheless, the rise in youth gambling issues and problems in the global context is not matched with a parallel increase in research on adolescent gambling. As such, there is an urgent need to conduct more studies on adolescent gambling behaviour. Recently significant advances in the knowledge of the risk factors associated with adolescent problems has emerged. This book addresses issues related to prevalence, assessment, prevention and treatment of youth gambling problems as well as concerns related to technological changes associated with youth problem gambling.

Creation Care Douglas J. Moo 2018-02-27 From Genesis to Revelation, the Bible reveals a God whose creative power and loving care embrace all that exists, from earth and sky and sea to every creeping, crawling, swimming, and flying creature. Yet the significance of the Bible's extensive teaching about the natural world is easily overlooked by Christians accustomed to focusing only on what the Bible says about God's interaction with human beings. In Creation Care, part of the Biblical Theology for Life series, father and son team Douglas and Jonathan Moo invite readers to open their Bibles afresh to explore the place of the natural world within God's purposes

and to celebrate God's love as displayed in creation and new creation. Following the contours of the biblical storyline, they uncover answers to questions such as: What is the purpose of the non-human creation? Can a world with things like predators, parasites, and natural disasters still be the 'good' world described in Genesis 1? What difference does the narrative of the 'Fall' make for humankind's responsibility to rule over other creatures? Does Israel's experience on the land have anything to teach Christians about their relationship with the earth? What difference does Jesus make for our understanding of the natural world? How does our call to care for creation fit within the hope for a new heaven and a new earth? What is unique about Christian creation care compared with other approaches to 'environmental' issues? How does creation care fit within the charge to proclaim the gospel and care for the poor? In addition to providing a comprehensive biblical theology of creation care, they probe behind the headlines and politicized rhetoric about an 'environmental crisis' and climate change to provide a careful and judicious analysis of the most up-to-date scientific data about the state of our world. They conclude by setting forth a bold framework and practical suggestions for an effective and faithful Christian response to the scriptural teaching about the created world. But rather than merely offering a response to environmental concerns, Creation Care invites readers into a joyful vision of the world as God's creation in which they can rediscover who they truly are as creatures called to love and serve the Creator and to delight in all he has made.

Old Testament Ethics for the People of God Christopher J. H. Wright 2013-02-28 Nothing confuses Christian ethics quite like the Old Testament. Some faithful readers struggle through its pages and conclude that they must obey its moral laws but may disregard its ceremonial and civil laws. Others abandon its teaching altogether in favor of a strictly New Testament ethic. Neither option, argues Chris Wright, gives the Old Testament its due. In this innovative approach to Old Testament ethics--fully revised, updated and expanded since its first appearance in 1983 as *Living as the People of God (An Eye for an Eye in North America)* and including material from *Walking in the Ways of the Lord*--Wright examines a theological, social and economic framework for Old Testament ethics. Then he explores a variety of themes in relation to contemporary issues: economics, the land and the poor; politics and a world of nations; law and justice; society and culture; and the way of the individual. This fresh, illuminating study provides a clear basis for a biblical ethic that is faithful to the God of both Testaments.

Public Places and Spaces Irwin Altman 2012-12-06 This tenth volume in the series addresses an important topic of research, design, and policy in the environment and behavior field. Public places and spaces include a sweeping array of settings, including urban streets, plazas and squares, malls, parks, and other locales, and natural settings such as aquatic environments, national parks and forests, and wilderness areas. The importance of public settings is highlighted by difficult questions of access, control, and management; unique needs and problems of different users (including women, the handicapped, and various ethnic groups); and the dramatic reshaping of our public environments that has occurred and will continue to occur in the foreseeable future. The wide-ranging scope of the topic of public places and spaces demands the attention of many disciplines and researchers, designers, managers, and policymakers. As in previous volumes in the series, the authors in the present volume come from a variety of disciplinary backgrounds, research and design orientations, and affiliations. They have backgrounds in or are affiliated with such fields as architecture, geography, landscape architecture, natural resources, psychology, sociology, and urban design. Many more disciplines obviously contribute to our understanding and design of public places and spaces, so that the contributors to this volume reflect only a sample of the possibilities and present state of knowledge about public settings.

Disability Studies and the Environmental Humanities Sarah Jaquette Ray 2017-06 Although scholars in the environmental humanities have been exploring the dichotomy between "wild" and "built" environments for several years, few have focused on the field of disability studies, a discipline that enlists the contingency between environments and bodies as a foundation of its scholarship. On the other hand, scholars in disability studies have demonstrated the ways in which the built environment privileges some bodies and minds over others, yet they have rarely examined the ways in which toxic environments engender chronic illness and disability or how environmental illnesses disrupt dominant paradigms for scrutinizing "disability." Designed as a reader for undergraduate and graduate courses, *Disability Studies and the Environmental Humanities* employs interdisciplinary perspectives to examine such issues as slow violence, imperialism, race, toxicity, eco-sickness, the body in environmental justice, ableism, and other topics. With a historical scope spanning the seventeenth century to the present, this collection not only presents the foundational documents informing this intersection of fields but also showcases the most current work, making it an indispensable reference.

Traditional, Complementary and Alternative Medicine Gerard Bodeker 2007 This is the first book to address public health issues in traditional, complementary and alternative medicine (TCAM). It presents state-of-the-art reviews of TCAM research in a range of priority public health areas such as malaria and HIV and in such common ailments as skin conditions and orthopedic injury in developing countries. Contributions analyze policy trends in areas such as financing of TCAM and education and training in this field as well as selected case studies of model TCAM projects. Important chapters on research methodology, ethical and safety issues, and intellectual property rights pertaining to traditional medicine are also presented. includes an analysis from the World Health Organization's (WHO) Global Atlas data of the worldwide trends in this area. People's Republic of China International Monetary Fund. Asia and Pacific Dept 2013-07-17 This staff report on People's Republic of China 2013 Article IV Consultation highlights macroeconomic developments and outlook. China has maintained robust growth since the global crisis, but the heavy reliance on credit and investment to sustain activity is raising vulnerabilities. The consequence is a steady build-up of leverage that is eroding the strength of the financial sector, local government, and corporate balance sheets. This is most apparent in the continued rapid expansion in total social financing. The development of nontraditional finance marks a shift to more market-based intermediation, and the migration of activity to less-regulated parts of the system poses risks to financial stability.

Banking on Change London Institute of Banking and Finance 2019-09-02 PRAISE FOR Banking on Change "In this 140th Anniversary celebration book, The London Institute of Banking and Finance stick to their core function of educating us all, but especially aspirant bankers, on the role and concerns of (retail and commercial) banking in the UK. They have assembled a well-chosen group of practitioners from a range of professions to write clear and easily assimilable essays, no technical expertise required, on a wide variety of current banking issues. If you want to learn about the current practices and problems of UK retail banking, this book must be essential reading." —Charles Goodhart, emeritus professor of banking and finance at the London School of Economics "In this important book, a line from Bill Allen's contribution is key: 'Nobody can predict the ferocity of the gale of creative destruction' that faces the financial services sector. True; but if you read the many and varied contributions, you'll have a pretty good idea. Moreover, you'll understand how we (that is, bankers) got here – and what we should do to make the industry more competitive, fairer and more genuinely useful. It is a soup-to-nuts look at banking – from the early days of the Institute of Banking, through the go-go years of ifs, to a present and future that are likely to be dominated by technology. It is well-worth a long read." —Andrew Hilton, director, Centre for the Study of Financial Innovation "If you were to imagine what a book celebrating 140 years of financial knowledge might contain, you could not come up with a better selection than this. As well as a historic sweep – from no-tech to fintech, the decline of trust and the rise of competition – today's hot subjects are addressed, including sustainable investing, cultural diversity and digital identity. The cradle-to-grave nature of the industry is captured in pieces about financial education and pensions. And it's well written, setting the scene nicely for the next era." —Jane Fuller, Fellow of the Society of Investment Professionals Financial services are undergoing rapid, and potentially dramatic, change. What will happen in payments, in sustainable finance and in fintech? How can the industry boost financial inclusion and ensure that its workforce has the skills it needs to meet regulatory requirements and to compete with new entrants? Can trade finance rise to the challenge of underpinning global trade for all and help the developing world avoid "financial abandonment"? What do financial services need to do to protect our digital identities? Banking on Change provides insights by experts and influencers from across the financial services industry on these and other questions. Published to mark the 140th anniversary of The London Institute of Banking &

Finance, this book is intended to be of lasting value to both students and professionals.

Collected Papers on Wave Mechanics: Third Edition Erwin Schrödinger 2003 The famous equation that bears Erwin Schrödinger's name encapsulates his profound contributions to quantum mechanics using wave mechanics. This third, augmented edition of his papers on the topic contains the six original, famous papers in which Schrödinger created and developed the subject of wave mechanics as published in the original edition. As the author points out, at the time each paper was written the results of the later papers were largely unknown to him. This edition also contains three papers that were written shortly after the original edition was published and four lectures delivered by Schrödinger at the Royal Institution in London in 1928. The papers and lectures in this volume were revised by the author and translated into English, and afford the reader a striking and valuable insight into how wave mechanics developed.

The Mission of God's People Christopher J. H. Wright 2010 In *The Mission of God's People*, part of the *Biblical Theology for Life* series, author Chris Wright offers a sweeping biblical survey of the holistic mission of the church, providing practical insight for today's church leaders. Wright gives special emphasis to theological trajectories of the Old Testament that not only illuminate God's mission but also suggest priorities for Christians engaged in God's world-changing work.

Following Jesus, the Servant King Jonathan Lunde 2010-11-23 "This book presents a biblical theology of discipleship that gives the "big picture" of God's relationship with humanity. It surveys God's interaction with humankind from Eden, through the sequence of the biblical covenants, and on into the fulfillment that comes in Jesus. Throughout, the twin themes emerge—one of God's demand of righteousness and another of his prior, enabling grace. Discipleship to Jesus stands in relation to its Old Testament precedents, preserving continuity in the grace/demand interplay. Jesus' ministry to Israel is the fulfillment of the interactions between God and his people, assuming the roles of righteous King and gracious Servant. Faithful discipleship to Jesus the King, therefore, must always involve responding to his bracing call for righteousness, but doing so in the ongoing experience of the Servant's prior, enabling grace. This book provides an understanding of Jesus that will facilitate ongoing experiences of transforming grace, which in turn will enable faithful discipleship. As such, it presents a view of Christian discipleship that is grounded in an informed Christology of Jesus, the Servant King."

The Kingdom of God Nicholas Perrin 2019-02-26 In the last hundred and fifty years the kingdom of God has emerged as one of the most important topics in theology, New Testament studies, and the life of the church. But what exactly is the kingdom of God? What does it mean for the people of God and what does it mean for how they live in the world? In *The Kingdom of God*, part of the *Biblical Theology for Life* series, Nicholas Perrin explores this dominant biblical metaphor, one that is paradoxically the meta-center and the mystery in Jesus' proclamation. After surveying interpretations by figures from Ritschl to N. T. Wright, Perrin examines the "what, who, and how" questions of the kingdom. In his sweepingly comprehensive study, Perrin contends that the kingdom is inaugurated in Jesus' earthly ministry, but its final development awaits later events in history. In between the times, however, the people of God are called to participate in the reign of God by living out the distinctly kingdom-ethic through hope, forgiveness, love, and prayer. X
