Reputation Charles J. Fombrun 1996 Good reputations, says Charles Fombrun, create wealth. In this thoroughly accessible book, Fombrun shows that by developing strong and consistent images, well-regarded companies generate hidden assets - or reputational capital - that give them a distinct advantage. Reputation examines how companies in a variety of industries, such as international fashion, investment banking, packaged goods, and even U.S. business schools, compete for prestige and achieve celebrity. Vital,

relevant, and readable for professionals in public, community, investor, and employee relations as well as brand and marketing managers and senior executives.

Projective Ecologies Chris Reed 2020-04-30 The past two decades have witnessed a resurgence of ecological ideas and ecological thinking in discussions of urbanism, society, culture, and design. The field of ecology has moved from classical determinism and a reductionist Newtonian concern with stability, certainty, and order in favor of more contemporary understandings of dynamic systemic change and the related phenomena of adaptability, resilience, and flexibility. But ecology is not simply a project of the natural sciences. Researchers, theorists, social commentators, and designers have all used ecology as a broader idea or metaphor for a set of conditions and relationships with political, economic, and social implications. Projective Ecologies takes stock of the diversity of contemporary ecological research and theory--embracing Felix Guattari's broader definition of ecology as at once environmental, social, and existential--and speculates on potential paths forward for design practices. Where are ecological thinking and theory now? What do current trajectories of research suggest for future practice? How can advances in ecological research and modeling, in social theory, and in digital visualization inform, with greater rigor, more robust design thinking and practice? How does all of this point to potential paths forward in an age of climate change and the need for adaptation and mitigation? With Contributions of: Jesse M.
