The Open Boat Stephen Crane 2020-09-14 None of them knew the colour of the sky. Their eyes glanced level, and were fastened upon the waves that swept toward them. These waves were of the hue of slate, save for the tops, which were of foaming white, and all of the men knew the colours of the sea. The horizon

narrowed and widened, and dipped and rose, and at all times its edge was jagged with waves that seemed thrust up in points like rocks. Many a man ought to have a bath-tub larger than the boat which here rode upon the sea. These waves were most wrongfully and barbarously abrupt and tall, and each froth-top was a problem in small boat navigation. The cook squatted in the bottom and looked with both eyes at the six inches of gunwale which separated him from the ocean. His sleeves were rolled over his fat forearms, and the two flaps of his unbuttoned vest dangled as he bent to bail out the boat. Often he said: "Gawd! That was a narrow clip." As he remarked it he invariably gazed eastward over the broken sea. The oiler, steering with one of the two oars in the boat, sometimes raised himself suddenly to keep clear of water that swirled in over the stern. It was a thin little oar and it seemed often ready to snap. The correspondent, pulling at the other oar, watched the waves and wondered why he was there. - Taken from "The Open Boat" written by Stephen Crane

Concepts of Biology Samantha Fowler 2018-01-07

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that

instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Bend, Not Break Ping Fu 2013-11-26 Born on the eve

of China's Cultural Revolution, Ping Fu was separated from her family at the age of eight. She grew up fighting hunger and humiliation and shielding her younger sister from the teenagers in Mao's Red Guard. At twenty-five, she found her way to the United States; her only resources were \$80 and a few phrases of English. Yet Ping persevered, and the hard-won lessons of her childhood guided her to success in her new homeland. Aided by her well-honed survival instincts, a few good friends, and the kindness of strangers, she grew into someone she never thought she'd be—a strong, independent, entrepreneurial leader. "She tells her story with intelligence, verve and a candor that is often heart-rending." —The Wall Street Journal "This well-written tale of courage, compassion, and undaunted curiosity reveals the life of a genuine hero." —Booklist (starred review) "Her success at the American Dream is a real triumph." —The New York Post
